ACKNOWLEDGEMENTS

The Council of Supply Chain Management Professionals (CSCMP) and Supply Chain Visions thank the many individuals and companies who volunteered their time as Subject Matter Experts (SMEs), contributing substantial information and other valuable assistance during the creation of the first edition and this second edition of the *Supply Chain Management Process Standards (Standards)*.

With the assistance of the SME group, the body of “minimum acceptable” and “best practices” has been improved, expanded, and validated. The representative descriptors contain noteworthy guidance for all who are involved in the area of logistics and supply chain management. There is a complete list of SME companies on page 151 of this reference book.

We would also like to acknowledge the contribution of APQC, for allowing CSCMP to use the open standard *Process Classification FrameworkSM (PCF)* as the organizing foundation, and for providing invaluable support and expertise in the development of this edition of the *Standards*.

CSCMP would also like to express gratitude for the contribution in hours, resources, and knowledge that Supply Chain Visions has invested in updating this, the second edition of the *Supply Chain Management Process Standards*.

TABLE OF CONTENTS

Acknowledgements	2
Introduction	3
Purpose of the Standards	3
Description of Research	4
Process Classification Framework SM (PCF)	4
Research Methodology	5
The Standards	6
The Structure of the Standards	6
Using the Standards for Self-Assessment	7
The Importance of Setting Priorities	8
The Link to APQC’s OSBC Survey and Metrics	8
Supply Chain Process Standards -Tables	10
Glossary of Terms	124
List of Contributors	151
