Company	Century Supply Chain Solutions
Title/Current position	Chief Information Officer
Education	Chubb Technology Institute - No formal degree, technical school
LinkedIn URL	https://www.linkedin.com/in/jimmccullen/
When and why did you join CSCMP?	I just recently joined. I have followed CSCMP throughout the years but our company never engaged directly. My goal is to change that and to embrace what CSCMP is doing and share the value back to my team and our company.
What advice do you have for new CSCMP members on how they can maximize their membership value? What membership benefit do you find most valuable?	Engage in the round table events, those are your people. Engage with them, find ways to network and more importantly to add value. The annual conferences are a great learning experience (even though I have only been to one so far) and something you should build into your annual calendar.
What has been the most impactful connection you have made through CSCMP membership?	Its early to say at this point, I think it was just more the experience, the vibrancy, the engagement I experienced at the last CSCMP conference.
How did you get into supply chain management/logistics?	I started as a software developer working for a firm that was a partner company to the company I work for today. That journey started over 30 years ago, they sent me traveling all over the world to implement a global supply chain management platform for their customers. I have spent my entire career in logistics at Century and I still find new challenges everyday. I love Logistics!
Describe your job in a tweet (i.e. 140 characters).	I am responsible for a global team of over 100 supply chain technologists. Our goal is to help our customers enhance, expand and accelerate their supply chains. Supply chain is about turning chaos into calm and recognizing that there will always be a new challenge, but that we can prepare for and solve whatever comes at us.
What are your top three job responsibilities?	Corporate IT strategy Team development and motivation Customer Engagement

What is the biggest challenge you face on the job, and how are you managing it?	Finding proper work-life balance for my teams so that we can exceed customer expectations but maintain a high quality of life.
What technologies, trends, or disruptive forces do you see having the biggest impact on supply chains?	Generative AI is changing how we design, build and deliver solutions in supply chain, i am so excited about our future. Similar to when the internet first started, but we are seeing impacted in days, weeks and months instead of years.
If you were to start a company from scratch, what values would you build it on?	The core value would be ensuring that each individual role contributes directly to the value of the company using technology to differentiate and empower individuals. I believe work can and is a key way that we define ourselves. It is not and should not be the complete definition, but it plays a critical role in individual success and happiness.
What are you proudest of?	I need to break that into three areas of focus 1) My career at Century, I absolutely love what I do and have great respect for those I work with. 2) My family. I have been married for 29 years, have two boys, one is out on his own in the IT field and the other is going to Virginia Tech for Engineering. 3) My mountain biking. I love to ride and race mountain bikes, it is my passion.
If you could interview anyone, who would it be and why?	Tony Robbins. He started from nothing and built the life he dreamed of. Most importantly he gives back so much to the communities in need.
What was your childhood dream job?	According to my grandmother and my mother. I wanted to be a garbage truck driver. I guess logistics was in me from my early days....
When you retire, what will be the first adventure you take, or what will be the first thing you will do for which you may not otherwise have had the time?	I will try to slow down a bit and spend time just being with people i know and would like to spend more time with. Road trips to visit folks and just hang out for a while.
Write your own question and answer! What have we not asked that would be interesting for other CSCMP members to learn about you?	What is your biggest challenge or weakness? I have a tendency to respond too quickly and immediately try to solve problems. I have learned over the years, sometimes its better to just listen and let people come up with their own answers. I am still working on that every day.
Are you available for a virtual video interview for the CSCMP Member Monday series?	Yes!
